CERTIFICATIONS

- Mobile App Design in figma [from concept to prototype]
- Canva Graphic Design Course for Beginners
- WordPress Development – Great Learning

SOFT SKILL

- Communication skill
- Team Work

PROJECTS

BeatBox(Music App),Figma

- Designed a music streaming app UI with structured navigation, personalized music sections, and smooth user flow.
- Built a scalable design system in Figma using components, variants, color styles, and text styles for consistency and reusability.
- Built interactive prototypes so users and developers can easily understand how the app works.

SocialGram(Instagram clone),Figma

- Designed a feature-rich Instagram-inspired social media application with a strong focus on usability and modern UI/UX.
- Implemented authentication, interactive feed, posts, search, chat, notifications, and profile management using Figma.

Grocery Glide (Team)(Android)

- The primary objective of this project is to provide a convenient and user-friendly platform for browsing, ordering, and managing grocery items through a mobile application.
- Used Firebase for user authentication and real-time database and Cloudinary for product image storage.

Rhythm Wave (Music Website), GitHub

- A dynamic music website for seamless streaming, downloading, and music management for users and admins.
- User Side: Music play and download functionality, along with user uploads.
- Admin Side: Admin panel for content management, uploads, and monitoring.
- Technologies Used: HTML, CSS, JavaScript, PHP, MySQL.

Calculator (JavaScript), GitHub

- Basic Calculator built with JavaScript to demonstrate keen interest in Web development.
- Developed a basic calculator app with functions like add, subtract, multiply, and divide.
